

CIEMAT to contract revision, upgrade and modification of membrane distillation laboratory equipment

SolarSpring GmbH, a 100% subsidiary of Clean Industry Solutions Holding Europe AB, and Centro de Investigaciones Energéticas, Medioambientales y Tecnológicas (CIEMAT) have closed a contract for a tailor-made revision and modification of the existing MDlab facility to enable new features. The contract sum amounts to € 22,570.

SolarSpring and CIEMAT are long term cooperation partners in the field of membrane distillation research. CIEMAT is a research center in the south of Spain which provides optimal testing grounds for a variety of solar technologies and solar powered water treatment systems due to the high annual solar irradiation and vicinity to the ocean.

Prompted by the begin of a new research project, an upgrade and modification of the existing MDlab designed by SolarSpring and located at CIEMAT was requested and contracted for an amount total of € 22,570. Besides a thorough revision and upgrade to the latest standard, the versatile testing facility will be modified to operate hollow fiber membranes as well as the already possible flat sheet membranes – a feature required for the upcoming research. The system upgrade will be carried out by SolarSpring personnel on site in the near future.

Clean Industry Solutions Holding Europe AB holds 100% of Industrial Solar GmbH and 100% of SolarSpring GmbH - both located in Freiburg/Germany.

Industrial Solar GmbH is an international leading technology and solution provider, which develops projects mainly based on its innovative Fresnel collector technology suitable for fulfilling an expected growing market of solar process heat. As a one-stop-shop Industrial Solar offers turnkey solutions for customers in several industries.
